<u>STAND UP</u>

I am creating a website for "*The 47 Spot*", a monthly hip hop event in Atlanta, GA & Columbus, GA. I would like to add a feature that allows users to create a simple profile only including minimal details about themselves, but just enough to distinguish users apart. I would also like for them to be able to send messages to the administrators of the site, if that is a skill that I can acquire in two weeks; I'll see what I can come up with. My main goal is to at least allow the user to create an account, log in, or continue to use the site as a guest; and so I will focus on that this week.
